About Us - Sunshine Industries India is a contract Manufacturer

Sunshine Industries (India) is a leading manufacturer of automotive plastic components, consumer electronics plastic components, home appliances plastic products and plastic fittings, furniture hardware products, plastic vacuum formed and thermoformed products. Established in 1992, Based in New Delhi, India, the Company has demonstrated rapid growth and is recognised for low cost manufacturing capabilities and established high quality client base.

Sunshine Industries (India) is capable of product designing, product development, turnkey manufacturing. we are globally competitive in terms of cost of production and high quality products.

Sunshine Industries (India) continues to charge forward achieving excellence in manufacturing plastic products, rubber components and plastic vacuum formed products. We have developed more than 2800 plastic injection moulds and developed over 500 products and supplying to the most renowned companies in India and overseas companies also.

Sunshine Industries (India) has been an prominent supplier of automotive majors like Minda Corporation Limited, Lumax Industries Limited, Neelite ZKW Lighting Limited; electronics majors like Ntl Electronics India Limited, HPL Electric and Power Private Limited, RC Bentex Energy Metering Private Limited; home appliances majors like Nutech Technoservices Private Limited, Padmini Impex Private Limited, Cata Appliances Limited as a preferred contract manufacturer.

Our Vision

To emerge as the largest and most cost effective manufacturer and supplier of automotive plastic components, home appliances Plastic Products and fittings, electronics devices plastic components, furniture hardware products for domestic and international market.

Since the foundation of our company, Sunshine Industries (India) is driven by its vision. Innovation and satisfaction are at the core of everything we do at Sunshine Industries (India), we intend to expand our business operations and develop innovative products at low cost. we will be focused towards becoming a most preferred supplier for global OEM's and also emerge as a preferred employer in our industry and we always intend to increase the level of priority to make sure that only the best and tested products are supplied to our customers.

Our Mission

Our mission is to become a most preferred manufacturer of plastic and rubber components in the industry of Plastic Injection Moulding and being recognised as an organisation who is committed to deliver what our customers has asked for and quality which extends the expectation of our customers.

- **Investment** - We will be expanding our business operation by opening up a new unit with that we will be adding some great machineries also to increase our productivity.
- **Customers** - Strengthen our customer relationships by providing them better products and services of

About Us - Sunshine Industries India is a contract Manufacturer

greatest value through cost effective techniques and excellence.

- **Quality** - Execute with excellence, drive to six-sigma capability in all key processes and exceed customer expectations.
- **Innovative Products** - We will be developing innovative products and start assembly operations for electronics products and we will developing our capabilities in PCB and final assembly of complex products.

Our Values

- **Open Communication** - Customer interaction, discuss design aspects, knowledge and experience sharing, give genuine information and advice for the products of the customers.
- **Commitment to customers** - We believe in commitment, we initiate, implement and completes what has committed to our customer.
- **Passion for Excellence** - Relentlessly improving and continuously raising the bar in everything we do.
- **Global Quality Levels** - Offering products and services that has global quality levels.

Our Clients

We have the privilege of working with some of the most well known companies in the world and we don't take this lightly. our clients engage us in a number of ways — we develop plastic injection moulds and products. we view our clients as partners and work collaboratively with them to achieve results they can measure.

we work both diligently and intelligently to ensure that the needs of our clients come first. and we're not afraid to push the envelope or encourage restraint. We are only as good as the reputation of our clients, and we willingly put our own reputation on the line to ensure that they get as much out of the relationship as we do.

Eminent Solution for Automobile Manufacturers

Manufacturing and Supplying Global Quality Custom Type Plastic Products

Today's automotive industry not only is under pressure, but also facing with more complex design challenges including fuel economy and material savings. as more and more plastics have been chosen as the preferred alternative, optimized plastics injection moulding processes is essential for automakers to remain competitive in the industry.

Where we assist our clients in complex products and parts development we also guide them for material selection and design which suits the application of the product itself.

We provide the widest range of solutions to the automobile manufacturing industry, Sunshine Industries (India) is among leading manufacturers of Automotive plastic products, and becoming the industry leading OEM supplier. Sunshine Industries (India) have had the opportunity to supply the plastic products and moulds to India's flagship automotive brands like Minda Corporation Limited, Lumax Automation Industries Limited, Britax PMG Limited. we supplies to major automobile manufacturer in the country and overseas.

Developing business relationships with world leaders in the automotive industry was a masterstroke for growth of Sunshine Industries (India), stimulating the company to set global standards of performance for itself and develop world-class products.

We operate in a continuous improvement culture that allows us to constantly enhance product performance and help you increase profitability. we understand the needs of customers around the world and are constantly working to develop creative and innovative products to meet the demands of individual markets. With this focus on continuous improvement through products and quality assurance, we are able to be "our customers best partner."

Since 1992, Sunshine Industries (India) is built on a rich tradition of commitment to customers. Our customer focused traits have promoted the growth of our business to include automotive and other products. Our contract manufacturing can help you take your product from concept to market. For specialty solutions that keep your business on the cutting edge, trust SII. To learn more visit our factory.

Eminent Solution for Electronics Products Manufacturers

Manufacturing and Supplying Global Quality Custom Type Plastic Products

Plastics are used largely for electronics devices, lighting products due to its premium thermal and insulating properties. The wide application can range from electronic switchgear box, electrical switches, electronic plastic enclosures, electrical light fittings... etc. Due to more and more electronics are featuring with lightweight, small size, high power and high efficiency, the miniaturization trend has posed great challenges on plastic electronic parts.

We are the preferred manufacturer and supplier of various types of plastic components for electronics industry. we have develop many plastic products and supplying to electronics majors.

Sunshine Industries (India) has grown into a diversified electronics plastic products manufacturing company and offering a broad range of products and services to electronics products manufacturers. It has continuously invested in strengthening its design & product development capabilities and has established strong business relationships with electronics majors.

Today, the SII offerings range from customized product design & development, manufacturing services and turnkey solutions for mission-critical applications to the electronics products manufacturers.

Sunshine Industries (India) strategic electronics - the strategic electronics business unit offers design services and develops electronics products for defence and various electronics majors. Sunshine Industries (India) is the leading industry supplier for India's DRDO labs, as well as key electronics companies.

Sunshine Industries (India) is engaged in the custom type plastic products manufacturing and assembly of electronics products. We provide engineering solutions to various requirements in the field of plastics, rubber and thermoforming products for the industrial customers.

Eminent Solution for Appliances Manufacturers

Manufacturing and Supplying Global Quality Custom Type Plastic Products

With years of experience supplying various type of plastic products to home appliances majors, we understand the challenge which the industry faces today – to reduce costs, improve sustainability and cope with changing consumer tastes. we provides a eminent solution of custom type plastic products with great quality that focuses on enabling manufacturers to make appliances that are more robust and more cost-efficient.

We are committed to continuously developing new, innovative products and improving current products, used in a range of home appliance parts.

Sunshine Industries (India) has 22 years of expertise in plastic injection moulding of high-end aesthetic appliance parts moulded from engineering grade resins of wide range.

Today we are supplying custom type top quality plastic products to high-end appliances manufacturers including chimney's, cooktops, water purifiers and several other appliance components and assemblies.

We assist our clients in new appliance part designs, redesigns and improvements, We serves the appliance industry with the global quality products and latest techniques, we procure only superior quality material from our reliable suppliers which helps to produce advanced products and moulds which demanded by the highest quality appliance manufacturers around the world.

By means of our forward-looking, progressive and innovative touches in the products, we are successful in gaining reputation and being preferred supplier to home appliances majors like Ultrapure Technology & Appliances Limited, Cata Appliances Limited, Padmini Impex Private Limited. We welcome our client with their custom type products and we assist them with the product design and material selection, we develop moulds and products according to their specification and needs.

Eminent Solution for Consumer Products Manufacturers

Manufacturing and Supplying Global Quality Custom Type Plastic Products

The applications of plastics have extended far beyond daily products. They range from personal care, household goods, food and beverage packaging, toys, sporting equipment to electrical components and panels. In other words, plastics are ubiquitous in our daily lives and play a vital role in consumer products industry. However, consumer products manufacturers will have to ensure their success by making a quick response to constant challenges such as mass production, product quality variation, material savings and time-to-market.

At Sunshine Industries (India) we welcome our clients with their custom type products designs.

Our products are made under exact standards with a rigorous quality control check that ensures perfect standards at all stages of manufacturing. No wonder that our plastic products range finds wide acceptance and acknowledgement in and across the country.

We plans and prepares to constantly improve our range of products to meet your everchanging needs. we are always ahead in creating new product as per our clients specifications as well as suitable to the present market trend. Creation is the heart of our organisation in this market.

A dynamic company that has taken the world of plastics to new height by giving our client with ultimate option of creating a new product designs by which we assist them in implementing the mould and product development. Each new product is been understand and designed by our expert engineer.

Product designed and manufactured by Sunshine Industries (India) for leading OEMs are used every day by millions of consumers around the world. we produce products using technologies such as one-shot, two-shot moulding. We work closely with our customers to determine the ideal material choice for long lasting craftsmanship that is aesthetically pleasing for consumers. we can provide a true low-cost injection moulding solution for your project.

Eminent Solution for Furniture and Kitchens Manufacturers

Manufacturing and Supplying Global Quality Custom Type Plastic Products

We are also proving the eminent solution to furniture manufacturers, offering furniture legs, shutter corner fittings, profile brackets, furniture fitting parts etc. Our strengths include a range of core competencies in manufacturing an ever widening product range with global quality levels at low-cost manufacturing.

We are providing our customer with cost effective products, supplying various of furniture hardware products to our prominent customers, furthest meeting the diverse needs of our customers. we also satisfy you with your personalized OEM needs for products innovation, and make sure the products quality meet the global standards.

We create the perfect combination of technology, functionality and design. we develop and produce products and fittings for furniture manufacturers which assist them to attain sustainability, profits and achieve maximum satisfaction from their end users.

We also guide our clients by our knowledge and extensive experience with their product designs and material selection. Thanks to our vast experience in complex furniture parts moulding, we have what it takes to get the job done efficiently, on time and in a cost-effective manner. As a contract manufacturer, Sunshine Industries (India) can provide you with complete assemblies, streamlining your manufacturing cycle.

Early supplier involvement at the start of each project is especially valuable in the design, mould building and manufacturing of complex furniture plastic parts. Majors in the furniture industry regularly rely on Sunshine Industries (India) to both design new products and reverse engineer existing products. In many cases, we try to identify the opportunities where we can reduce products development costs, while keeping in mind the functioning of products and enhance its appearance based on specification from customers.

Eminent Solution of Plastic Thermoforming Process

Manufacturing and Supplying Global Quality Custom Type Plastic Products

As Sunshine Industries (India) has grown, we have refined and further developed the thermoforming and vacuum forming process which allow to manufacture a large and complex products that could never have been conceived in the previous generation. Today's thermoformed products can match the quality and finish of injection molding, in high performance plastics, and in sizes that dwarf the capabilities of other other techniques.

We are also proud to offer a manufacturing service which is equally state of the art. we uphold a strong commitment to our customers and deliver the best they deserve.

Sunshine Industries (India) is the right choice for all your plastic thermoforming and vacuum forming packaging products needs. our experience in manufacturing packaging products will give you the competitive advantage you need to surpass the competition.

Sunshine Industries (India) offers the technologies and expertise for the packaging industry like thermoforming, vacuum forming, food packaging containers, seed trays, blister packaging, transparent packaging, pharmaceutical packaging, plastic cutlery tray ABS/PVC/PS/HIPS and various other products.

Have a product which needs to achieve certain regulatory standards? No problem. We are equiped with the facilities that fits to the standards you need to meet. We will also custom tailor inspection and testing programs specific to your products.

Sunshine Industries (India) works with our packaging customers on sustainability in design. For example, we work closely with our customers on designs and plastic thermoforming and vacuum forming processes to produce plastic packaging that weighs less, uses less material, and is manufactured with less energy and waste.

Sunshine Industries (India) Services Overview

Contract Manufacturing

We have the manufacturing facility and technical expertise to help your organisation to achieve industry-leading performance and optimize the costs of your products. Sunshine Industries (India) innovates through technological development and product engineering.

Sunshine Industries (India) is a contract manufacturer with a core competency in plastic injection moulding, plastic thermoforming and vacuum forming. We partner with original equipment manufacturers (OEMs) on mechanical and electronic products sub-assemblies to complete final assemblies and products.

Our OEM partners prefer us for contract manufacturing an extension of their manufacturing operations – providing them an integrated, streamlined, turnkey, cost effective manufacturing process for assemblies through finished products.

Custom Product Development

Sunshine Industries (India) is a full-service custom plastic product development company with in-house tooling and manufacturing facility. We service our customer's needs with end-to-end plastic product solutions—from design and prototyping through product development and production.

In addition to determining 85% of a plastic injection moulded parts cost, the design impacts quality, reliability, functionality, serviceability and manufacturability. It effects how quickly a new product can be introduced and is a key driver of competitive advantage.

With many manufacturers offering injection moulded plastic products, Sunshine Industries (India) believes our true success comes only from an approach and commitment to plastic injection moulding and plastic thermo-vacuum forming process that provides each customer unparalleled competitive advantage in terms of global quality, appeal, efficiencies and increased profitability.

Mould Development

With over 22 years of plastic injection mould design and mould building experience, Sunshine Industries (India) is known for high precision moulds designed and built to optimize plastic injection moulding performance and tool longevity.

Our skilled engineers and in-house tooling facilities use state of the art injection mould making equipment and technology, we have built up over 2800 moulds. Our dedication to project management provides our customers with timely project status updates.

Plastic injection moulds are an important asset and regular maintenance is important for longevity of the mould and quality of the parts it produces. Sunshine Industries (India) mould maintenance programs are customized based on the mould design, complexity and material, but typically include daily preventative maintenance, mould inspection, minor and more major mould maintenance.

Sunshine Industries (India) Services Overview

Plastic Injection Moulding

The very first step in plastic injection moulding process where we get to understand the product design & material selection, understanding the products application, intended market & performance, end use objective and use environment. Then the second step takes place where the tool is been designed on the latest softwares keeping in mind about mould efficiency, longevity and performance while designing the mould. In the third step the injection moulding process is finally initiated with latest injection moulding technologies, we thoroughly focus on product tolerances and product inspection is done.

Sunshine Industries (India) custom injection moulded products are providing competitive advantage for OEMs in many applications and markets, including automotive, utility vehicles, packaging, agriculture, construction, furniture, trucking, defence, consumer products, appliances and several other industrial products.

All of our plastic injection moulding facilities follow the same systems and procedures, so no matter which technique or facilities you use, our products will look and feel the same and provide the same high level of quality and service.

Plastic Thermoforming

Sunshine Industries (India) is a premium manufacturer and supplier of thermoformed plastic components, offering pressure thermoforming, vacuum thermoforming and twin sheet thermoforming along with various value-added services. Thermoforming is a plastic production process that heats a two dimensional rigid thermoplastic sheet and uses vacuum and/or pressure to form that sheet into a three dimensional shape. The combination of tooling and production time provides a measure of comparison. For pressure forming, the typical tooling time is 0-4 weeks, and first production typically happens within 1 week of that.

Sunshine Industries (India) offers the technologies and expertise for the packaging industry like thermoforming, vacuum forming, food packaging containers, seed trays, blister packaging, transparent packaging, pharmaceutical packaging, plastic cutlery tray ABS/PVC/PS/HIPS and various other products.
